

Message of solidarity of UFE to Poe-Doy

The Union of Finance Personnel, of which the Greek Finance Trade Union Poe-Doy is a member, declares its solidarity with the protests against the planned savings in public service. The savings programme presented by the Greek Cabinet specifies, among others, a hiring freeze in public service and cuts in salary, which according to the assessment of the Greek trade unions means pay cuts of up to 20 %.

Simultaneously, the taxation changes and increased fight against fraud suggested by the Finance Minister Giorgos Papakonstantinou result in a massive amount of extra work for the finance administration. In particular in view of this situation, it is not justified to discourage the employees in Greece's tax administration with salary losses.
